Trunk Burl

Found on the main trunk of the tree, trunk burls can be large and have a wide range of patterns, including swirls, eyes, and curls. Burls are the gnarly growths and deformities on trees, characterized by its irregular shape and intricate patterns.

Serpentine

Serpentinite is a metamorphic rock composed predominantly of serpentine group minerals formed by serpentinization of mafic or ultramafic rocks. The ancient origin of the name is uncertain; it may be from the similarity of its texture or color to snake skin.

Rammed Earth Wall

Rammed earth has been used in construction for thousands of years, with evidence of its use dating as far back as the Neolithic Period. Commonly used especially in China, the technique was applied to both ancient monuments and vernacular architecture, with the Great Wall utilizing the technique.
